HANDS-ON ACTIVITY: MY FIRST WEBSITE USING LARAVEL & LARAGON

Objective:
Create a simple personal portfolio website using **Laravel, Laragon, HTML, and CSS**.

Requirements

1. Laragon
2. Laravel Project
3. Visual Studio Code
4. Web Browser

Instructions

1. Open Laragon

- Start Laragon.
- Make sure Apache is running.

2. Open your Laravel Project

- Locate your project inside:
  C:\laragon\www\
- Open the project using Visual Studio Code.

3. Create your HTML page
Go to the public folder and create:

index.html

Create your webpage using HTML.

4. Your website must contain:

- Header with your **name and introduction**
- Profile picture
- Navigation menu
- **About Me** section
- **Hobbies** – at least 5
- **Skills** – at least 5

- **Education** – at least 3 records in a table
- **Contact Form** with Name, Email, Message, and Submit button
- Footer with your name and year

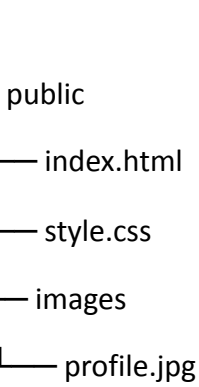

5. Add CSS
Inside the public folder, create:

style.css

Use CSS to make your website clean, organized, and attractive.

Expected Structure

your-laravel-project

Challenge

If you finish early, add a **Projects** section showing at least 3 projects.

Submission

Submit:

1. Your completed Laravel project folder
2. Screenshot of your website running in the browser

Remember: Make the website your own. Use your own name, information, photo, hobbies, skills, and educational background.

Goal: Build your first working webpage inside a Laravel project using Laragon.
